RE: Outbreak declared over

Good morning residents, staff and family members,
We are very pleased to announce that Goderich Place has been declared "out of outbreak"!!

I'm sure you share the same sense of relief that all persons infected with this virus have recovered well. This has been in large part due everyone's strict compliance with the directives and vaccine mandates set by public health and Goderich Place retirement. This outbreak was particularly concerning because of the number of staff and residents that were infected in such a short period of time.

For us to move forward and to help prevent future outbreaks we are asking that all residents, staff and family members where a mask on site at all times. Wearing a mask while not on the property is also highly recommended while at appointments, shopping or visiting family.

Washing your hands or sanitizing your hands consistently is also strongly recommended.

The community spread of the virus has hit us hard. Our staff have worked very hard during the outbreak in to keep our residents safe. This has been difficult on our residents and our staff.

All activities and dining will resume in public activation areas and dining areas. Visitors are not permitted to dine with residents and or take part in any of the public space events.

Let's work together to prevent future outbreaks so that our community can live a safe and happy lifestyle once again.

Visitors are expected to abide to the screening hours between 9am-4pm. All visitors are required to screen in, rapid test and where a mask and goggles at all times.

Best Regards,
Goderich Place management team
