

March 30, 2022

Dear Residents, staff & Families of Goderich Place,

I just wanted to share the results of residents PCR testing of residents on second floor phase 1,

They are all negative.

This leaves us with only 3 active resident cases that will be resolved April 1<sup>st</sup>.

We are PCR testing staff today and are hoping for no further spread.

To clarify residents not in isolation are now allowed to come out of rooms unless they are in isolation.

We are still considered to be "in outbreak".

Residents are still asked to not leave the property unless it is for an essential appointment.

All visitors must be deemed essential, pass all screening including RAT testing, and must be fully vaccinated.

We will be starting dining in the dining room tomorrow for supper. We look forward to seeing you!

I will send a communication out as soon as I receive more information.

Thank you all for your support during this very difficult time.

Management,
